

AUOCARE EXPERTS

COMPANY PROFILE

WE DARE TO CARE

CEO'S MESSAGE:

A company is as good as its workers and we here at AutoCare Experts are proud of our strength in producing a dedicated workforce which drives on to new heights with every passing year. It is our firm belief in due diligence that makes the company a smooth running operation based on pristine principles of hard work and innovation.

We at AutoCare Experts are committed to deliver the best in fabrication and structural support to the OMCs and their esteemed associates. Our fabrication brand has gone from strength to strength over the years and with the backing of the newly acquired MTC, (Material Test Certificate) we have the opportunity to tap into the limitless potential within the automotive industry.

I am grateful to be associated with such a well drilled team of professionals, who always push themselves to the utmost best of the best of their abilities in order to deliver the right product and churn out the right product and make sure that our **clients are always satisfied and trust us time and again** Here's to a bright a future.

Muhammad Hamid Khan
CEO

OUR MISSION:

To be the bastion of change in the market and **to be in charge of the new revolution within the fabrication industry** for oil tankers and commercial vehicles by providing the most authentic value added services to our esteemed cliental.

OUR VISION:

We strive in delivering that little 'extra' through quality products and with due diligence in our service we make sure that we achieve greatness in Fabrication and Manufacturing of Oil Tankers along with other commercial vehicles

“ We at AutoCare Experts are committed to deliver the best in fabrication and structural support to the OMCs and their esteemed associates. ”

ABOUT US

AutoCare Experts provides fabrication to its cliental, along with safe-solution options for the liquid and gas sectors. The company strives to deliver well manufactured and well equipped machinery to its OMC associates. **The firm deals in fabrication of Oil Tankers made out of first class carbon steel, MS (Mild Steel) and Aluminum.** The expedition of such logistical solutions is to facilitate a wide array of industries such as FMCG, Commodities Storage, Chemicals, Construction and Oil and Gas.

Currently AutoCare Experts is one of the leading Fabricators and structural suppliers of: Tipping Tankers, Semi-Trailers, Storage Tanks and Fuel Tanks. All of these tanks are OGRA and ADR compliant.

Located in the central heartland of the country (Sheikhupura) AutoCare Experts have fundamentally changed the way fabrication works with its modern equipment and skilled workforce, **AutoCare Experts is the one stop shop for all the Sales, Service and Spare parts related queries a potential client may have.**

WHAT

WE DO

We are one of the leading Fabricators in the country and provide our clients with expert service in the field of tanker modulation. **We have various dealerships that provide service, sales and spare (parts) for various trucks and tankers.** We also provide calibration and hydro testing facilities along with our transport and logistical company which has a fleet size of 200 vehicles.

AUTOMOBILE

AutoCare Experts represents a number of world renowned European, Japanese and Chinese brands like RENAULT, ISUZU, SINOTRUK, DONGFENG, JAC & DFSK

RENAULT

The firm deals in **RENAULT** Trucks with its 3S Dealerships located in Sheikhpura. Renault Trucks, a very strong French brand based on world's most advanced technologies. Renault Trucks are reliable with low fuel consumption that enables them to deliver greater productivity and control operating costs.

ISUZU

The company has a 2S Dealership of **ISUZU** located in Sheikhpura. Its principal activity is the spare parts and service of Isuzu commercial vehicles and diesel engines.

AutoCare Experts also deals in **DFSK** automations and has a 3 S Dealership located in Lahore. DFSK range consists on microvans, light commercial trucks, passenger vehicles and SUVs

JAC MOTORS

AutoCare Experts also deals in **JAC** Trucks with a 3S Dealership located in Gujranwala. JAC is a comprehensive and full-line independent brand known for producing quality commercial trucks.

SINOTRUK

There are 3S Dealerships in Lahore & Faisalabad representing **SINOTRUK**, a leading state owned truck manufacturer originated from China based on MAN (German) technology. These dealerships provide services comprising Sales, Warranty & after Sales Services as well as genuine spare parts for our valued cliental.

AutoCare Experts also have 3S Authorized Dealerships located in Sheikhpura dealing in **DONGFENG** Trucks, which is another leading brand from China. These tough vehicles are designed for professional operators with demanding operations for clean and efficient transportation.

CALIBRATION

Calibration services of Tank Lorries and underground tanks are being provided to the clients on a regular basis. **AutoCare Experts also possess a Certification of clearance from the SGS- a world's leading inspection, verification, certification.** This certification is also provided to Tank Lorries (which come to AutoCare Experts for Calibration) as well. AutoCare Experts has a Calibration Facility located at Machikay Sheikhpura.

HYDRO TESTING

To ensure the quality of product, we use Hydro testing, under the guidance of Velosi and Bureau Veritas (international attestation and certification brands) which is done to insure that the Tankers do not have any leakage; hence the chambers are filled with water and a pressure of 5 PSI is given for 30 minutes to new fabricated tanks and 3 PSI to the tanks already in service. **A Hydro testing Facility is located at Machikay Skeikhpura.**

A close-up photograph of a welder working on a large metal structure. The welder is wearing a blue protective mask and gloves. Bright sparks are flying from the welding point, creating a dramatic, high-contrast scene. The background is dark, making the sparks and the welder's equipment stand out.

FABRICATION

Fabrication is an industrial term that means to sway the raw materials (such as steel) for the making of machines and structures. **A process that can be well constructed by our experienced technicians who perform guaranteed high quality work because to AutoCare Expert, customer satisfaction is paramount.** AutoCare's entire Fabrication and operations revolves around OGRA S.R.O. -900(1)/2009 certification.

TECHNOLOGY

With the advent of new technological advancements in the field of fabrication and modulation **AutoCare Experts** has taken great strides in accommodating most of the new tech available.

Magnetic Particle Inspection

It is a type of non-destructive testing used for detecting surface cracks and shallow subsurface discontinuities in ferromagnetic materials such as steels and nickel-based alloys. The professional staff at AutoCare Expert can thoroughly perform this inspection and do not compromise on the quality of their work.

Dry Film Thickness

Dry film thickness is a critical measurement in the coating industry because of its impact on the coating process, quality and cost. Our workforce provides most pristine form of Dry Film coating process, which has been lauded by our cliental.

Radioactive Testing

It is a type of non-destructive testing to search for defects in the internal structure of metals and especially along any welding lines. X-Rays and Gemma-Rays can be utilized to perform this testing. We make sure we thoroughly test the vehicle and if there are any issues with the vehicle, we make sure all the necessary steps are taken to repair it. This is to ensure that our customers enjoy the best

PRODUCT

AutoCare Experts is one of the leading Fabricators and structure supplier and deals with a number of quality products which have great endurance and are of supreme quality. All the products which are being supplied are OGRA and ADR compliant:

Dry Bulk Tanks: These tankers transport raw materials such as plastic pellet which is shipped in large, unpackaged parcels.

Bulk Liquid Tanks: Bulk liquid storage tanks can be used for a variety of materials, including chemicals, water as they have portable liquid cylinders

Fuel Tankers/Semi-Trailers: This is a motor vehicle designed to carry liquefied loads or gases on road.

Gas Tanks: A tank used to carry gasoline to supply to a vehicle.

Storage Tanks: These are the tanks that have containers that hold liquids, compressed gases or mediums used for the short- or long-term storage.

MATERIALS

We use the best of materials to provide great service to our clients. **Our aim is to provide promising services to our clients to help them achieve their goals which will also help us achieve ours.** We use the best material in the production of our vehicles that will never displease our clients and will only leave them content with Auto Care Expert.

- **Carbon Steel:** A type of steel that provides ductility and strength, AutoCare Experts is using Carbon Steel of 275 HR which enhances the quality and durability of any product.
- **High Strength Steel:** A type of alloy steel that provides better mechanical properties or greater resistance to corrosion than carbon steel.
- **Stainless Steel:** A type of metal product that is more resistant to rust, staining and corrosion than regular steel. It is an alloy of iron and carbon.
- **Duplex Steel:** They are used for their good mechanical properties in the as-cast and/or their excellent corrosion resistance properties, higher strength leading to weight saving and has a better price stability.
- **Aluminium & Alloys:** They have high strength characteristics, as well as good weldability and resistance to corrosion. AutoCare Experts is using aluminium of very high quality which is of 5083 grade.

A technician wearing a yellow hard hat, safety glasses, and a respirator mask is using a spray gun to apply paint to a metal surface in a workshop. The technician is wearing a dark blue long-sleeved shirt and has a silver bracelet on their left wrist. The background shows a blurred industrial setting with a red fire extinguisher and a white van.

REPAIR AND MAINTENANCE

Our extensively skilled technicians can assist you with all methods of automotive repairs. We provide a wide array of repair and maintenance solutions:

- **Mechanical:** Full mechanical and automotive repairs available and ready to satisfy the clients
- **Electrical:** Our technicians are professional and well equipped enough to find the root cause of any sort of electrical problem in the vehicle.
- **Welding:** Welding is the most economical and efficient way to join metals permanently. We have the right team for this job and we provide great customer satisfaction with our welding services.
- **Denting:** It is paint less dent remover, and we have trained staff and advanced technology to restore the vehicle efficiently. Our staff is professionally trained and they work around the clock to give the maximum output for our clients.
- **Painting:** We use automotive paint for both protection and decoration purposes to a high quality commercial standard. Our team provides paint that protects the setting and assures a perfect paint finishing.
